

SECURING DIGITAL LIFE

Cyber Security Awareness Program

CYBER SECURITY AWARENESS PROGRAM

Cyber Security is not merely a need, it is a part of Life.

Cyber Security Awareness Program is initiative by Euinac Technologies to make a world understand the importance of Cyber Security in 21st Century. Learning can be through theory and practice; when theory is put into practice, there is a thin line between perfection and distortion. The seminar provides an intensive session which will empower students with knowledge; that is inaccessible to most, in a simplified and easily graspable manner. The objective is to provide awareness of web security to any and every user of the internet. We envisage a world where all Internet users are at a level footing. No one should be able take advantage or be taken advantage of by porous web security. Euinac took a pledge of Secure Digital Life which will help not only protect but also assess your safety and vulnerability ratio.

100% Practical Demonstration

On - Premises Training

Real - Time Case Study

Professional Trainers

*Cybersecurity damages are estimated to cost USD \$6 Trillion annually by 2021.
There is 3.5 million unfilled cybersecurity jobs by 2021.*

Table of Content

❏ Introduction to Digital India

❏ Social Engineering & Google Dorks Hacks

❏ Introduction to Information Technology

❏ Android Hacking & Its Security

❏ Email Attack & Its Security

❏ Live Case Study of Cyber Crime

❏ System Hacking & Its Security

❏ Career Opportunities

69% Indian Firms Face Serious Cyber Attack Risk

- Frost & Sullivan Study

Seminar Details

Delivery Method

- On - Campus Training

Delivery Type

- 100% Practical Demonstration

Duration

- 2.5 Hour

Per Participation Charge

- INR 200

Courses

- Securing Digital Life

Minimum Strength

- 300+

Infrastructure Required

- A Seminar Hall.

- Speaker and Microphone System in the Hall.

- LCD Projector for Live Demonstration.

- Internet Connection for Speaker.

Connected devices, poor coding and under-skilled IT is leading to increases in cyber attacks and growing demand for cyber security experts.
